Information about job offer

Job description

We are looking for a colleague to join our Energy Management Department who is ready to take on a meaningful challenge at U. S. Steel Košice - the largest flat-rolled steel producer in Central Europe. This role offers the opportunity to work in a dynamic environment where your insights will directly support strategic decision-making across the company. You'll collaborate closely with cross-functional teams including procurement, finance, operations, and corporate leadership.

The Market Analyst provides critical market intelligence and strategic analysis to help the company navigate the fast-evolving electricity and natural gas markets. Your work will contribute to securing reliable, sustainable, and cost-effective energy solutions for our operations, supporting long-term planning and business continuity.

Selection procedure information

Key Responsibilities:

- Monitor and analyze developments in electricity and natural gas markets (local, regional, and

global).

- Track regulatory and policy changes, market reforms, and macroeconomic and geopolitical trends relevant to energy procurement and operations.
- Develop market outlooks and scenario-based forecasts to support strategic planning.
- Prepare and deliver high-quality reports, briefings, and presentations for senior leadership.

Required Skills and Competencies:

- Strong understanding of electricity and natural gas markets.
- Knowledge of economic and financial interdependencies and market environment.
- Analytical thinking and strategic mindset.
- Excellent presentation and computer skills.
- Advanced English communication skills (written and spoken).
- Familiarity with relevant energy policy and regulatory frameworks.
- Continuous improvement and achievement of quality goals.

Benefits offered

We Offer:

- Attractive environment of international company with focus on results delivery.
- Friendly and informal company culture.
- Total Rewards package with competitive salaries and benefits with incentive opportunities:
 - 13th and 14th salary or yearly bonus program, Variable wage payment,
 - Subsidy for additional pension insurance (The 3rd pension pillar),
 - Up déjeuner payment card for cultural, social events, sports activities, and health needs,
 - Award for employees who considerably participate in the results achieved by the company.
- A focus on career growth and employee development that will establish not just a job, but a career.
- Ongoing training and education to enhance your career opportunities.
- Flexible working time and work from home possibility.
- Paid time off on significant life occasions.

Employee requirements

Required education

- Tertiary Education (Graduate)

Additional requirements

Target Profile:

- Master's degree in Energy, Economics, Business, Public Policy, Engineering, or related field.
- Proven ability to produce strategic reports and recommendations.
- 3+ years of experience in energy market analysis, policy advisory, portfolio management, or energy trading is an advantage.
- Experience working with energy companies, utilities, regulators, or consulting firms is a plus.
- Additional business-related work or related experience in operations service would be beneficial.
- Computer literacy with a working skill level in Microsoft Office products is required.
